Why should I get involved?

- Making your research outputs Open Access increases their potential for impact and collaboration. It also increases their visibility, dissemination, and potentially their number of citations.

- Many funders’ policies require papers to be made Open Access and will assess researcher compliance when considering future funding requests.

- HEFCE require that journal articles and conference proceedings accepted for publication after 1st April 2016 must be made Open Access to be eligible for submission to the post 2014 REF.

Glossary

**Article Processing Charge (APC):** A fee paid to a publisher by an author, author’s institution or funder, to make a paper Open Access within the published journal (Gold OA).

**Author final peer-reviewed text:** The final, accepted version of a publication, before the publisher’s copyediting, proof corrections, layout and typesetting.

**CC-BY:** Creative Commons Attribution Licence. This licence permits anyone to distribute, remix, or build upon a work, even commercially, provided that they credit the rightsholders for the original creation. One of several Creative Commons licenses, see below.

**CC-BY-NC:** As above but no commercial usage permitted.

**Creative Commons:** Global organisation that offers legal tools, including Creative Commons licences, that rightsholders can use to offer certain usage rights to the public, while reserving other rights.

**DOI:** A digital object identifier (DOI) is a unique identifier to identify content and provide a persistent link to its location on the Internet. The publisher assigns a DOI when your article is published and made available electronically.

**Embargo:** A publisher imposed period on making full text available in institutional and subject repositories.

**ORCID (Open Researcher and Contributor ID):** a nonproprietary alphanumeric code to uniquely identify academic authors. ORCID assists with linking accurate information about authors and their work to other online databases, repositories and profiles.

**UDORA:** An institutional repository, used at Derby, which houses metadata and full-text papers of scholarly outputs at the University.

For advice and assistance with depositing your research papers in the University institutional repository, contact Library UDORA Support: UDORA@derby.ac.uk.

Library guide for supporting researchers at the University of Derby: http://libguides.derby.ac.uk/research
Funders – as at January 2016

Failure to comply with funders' Open Access policies could potentially put both your future and current funding at risk.

Funders vary in how you can obtain money to cover APCs. Please check the Support for Researchers LibGuide for information:
derby-uk.libguides.com/research

Summary information

Research Councils UK (RCUK)
• Papers must be published under a Creative Commons CC-BY licence (gold route) or CC-BYNC licence (green route).
• MRC, BBSRC, and ESRC require articles to be deposited in subject repositories.
• Funds have been made available to some institutions to pay for open access. Derby is not in receipt of funds from RCUK.

COAF
- Charities Open Access Fund
• Partnership between Arthritis Research UK, Breast Cancer Campaign, British Heart Foundation, Cancer Research UK, Leukaemia & Lymphoma Research, and the Wellcome Trust. E: openaccess@wellcome.ac.uk
• All original research - journal articles and conference papers - must be made OA and published under a CC-BY licence.
• All papers must be deposited within the subject repository within 6 months of publication.
• Benefits include:
  • Free online availability of your published work.
  • Records of your publications are included in research databases.
  • Your work can be found and cited by other researchers.

Some other funders
• BRC/NIHR will pay the costs, which meet set criteria.
• European Commission – Open Access policies will apply.

Help available

Help is available from the University Digital Repository (UDORA) Support on UDORA@derby.ac.uk.

What is Open Access?

Open Access is the free online availability of peer-reviewed scholarly literature, including journal articles, conference papers, theses, book chapters, data and more.

Over the past 5 years, open access has become easier and it has certainly enabled articles to be read, downloaded and cited more than previously. Open access has also opened doors and I’ve built international contacts and debates with other universities. This has to be a good thing.

Dr Fiona Marshall
Health and Social Care Research Centre

What does this mean for me?

• Before submitting a paper for publication to a journal, please check the Support for Researchers LibGuide for information:
derby-uk.libguides.com/research

Open access has been great for me as a researcher. It enables me to access a bigger audience and discussion which benefits practitioners and policymakers.

Professor Tristram Hooley,
Head of the International Centre for Guidance Studies (iCeGS)

Open access has been great for me as a researcher. It enables me to access a bigger and wider audience including practitioners and policymakers. I feel that as academics we have a duty to put our research into the public domain to benefit the whole of society.

Professor Tristram Hooley,
Head of the International Centre for Guidance Studies (iCeGS)

How do I make my research Open Access?

Help is available from the University Digital Repository (UDORA) Support on UDORA@derby.ac.uk.

Gold route
• The published work is freely available for all to read on the publisher’s website.
• Usually involves payment of an Article Processing Charge (APC) by the author, author’s institution, or funder.

Green route
• You make a version of your peer-reviewed, published work freely available on your personal website (green route) or institutional repository (gold route).
• You deposit your version of your peer-reviewed, published work in a repository within 6 months of publication.

To be a good thing.

Dr Fiona Marshall
Health and Social Care Research Centre

Some other funders

• If your journal publisher does not allow the green route, you may need to take the gold route if your funder requires.
